

## Offline Programming

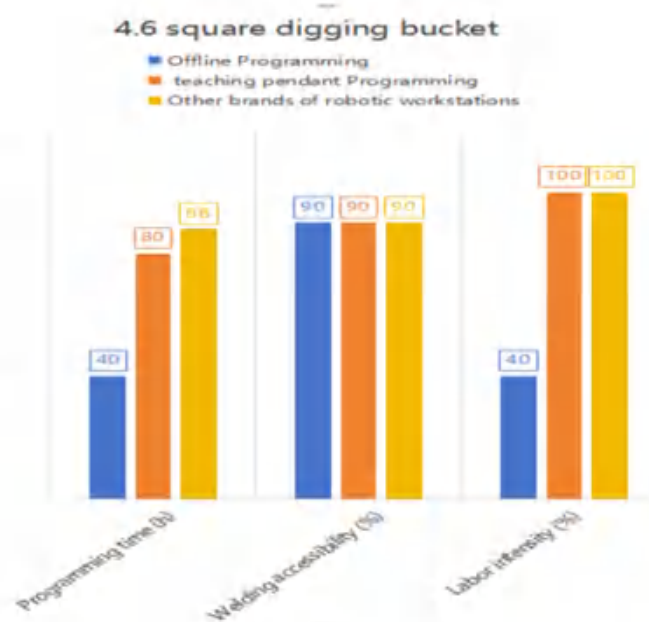

### Metalleco Offline Programming

- 1.Supports synchronized collaborative programming of multiple robots for fixture-free welding
- 2.The export program does not need to correct point positions after a search.
- 3.Multi-layer and multi-channel programs are generated directly with the Welding Expert database for easier on-site application.
- 4.Suitable for welding, painting, cutting, etc., can be installed line laser and point laser for use.

### Advantages of Metalleco Offline Programming

- 1.Reduces robot downtime and dramatically improves equipment utilization
- 2.Programmers are removed from hazardous working environments, reducing safety hazards and labor intensity.
- 3.Factories no longer need to worry about many products, urgent orders and slow programming
- 4.Metalleco Offline Programming can replace some of the manpower and reduce labor costs.
- 5.Automated production processes are accomplished
